Github: <https://github.com/rheasushanth/SE-Labs-PES1UG24CS371>

Task 1: Bug fix. Fixed the catch check so a fish is caught only when the hook actually touches it, not just when it's at the same depth.

Task 2: Fish types. Added three kinds of fish that differ in speed, size, colour and points. The faster ones are worth more.

Task 3: Player casting. The hook no longer casts by itself. The player presses SPACE to cast, and pressing it again mid-cast does nothing.

Task 4: Round timer. Added a 30-second countdown on screen. When time runs out, the game stops and shows the final score, and pressing R starts a new round.

Finished Screenshot:
